SUMMARY OF THE REASONS FOR DECISION:

The computer image file entitled *Picture 3830.jpg* is classified as:
Objectionable.

This classification is because the publication promotes and supports the exploitation of young persons for sexual purposes.

The publication is a computer printout of an image file containing a colour photograph, printed on A4-sized paper. The image file explicitly depicts a young teenage girl posed in a sexualised manner that reveals and emphasises her genital nudity. The girl's youth is emphasised by her hairstyle and by the props that are visible in the background. A sexual reading of the image is encouraged by the medium in which it is presented, and the likely purpose for which it is intended to be used (the sexual gratification of persons with a prurient interest in young girls).

The Classification Office has considered the effects of the New Zealand Bill of Rights Act 1990 on the application of the classification. The classification of this publication interferes with the freedom of expression, but this is an outcome that is consistent with Parliament's intention that publications falling under s3(2) of the Films, Videos, and Publications Classification Act 1993 are deemed to be objectionable. The classification is also a reasonable limitation on the freedom of expression that reflects the concern of "a free and democratic society" to limit the availability of publications that promote and support the exploitation of children or young persons for sexual purposes.
